<b>1</b>	<b>The 802.11 Standard</b>	<b>2</b>
1.1	802.11 MAC Layer [2] . . . . .	3
1.1.1	MAC Access Modes . . . . .	3
1.1.2	Contention Based Access Using DCF . . . . .	4
1.1.3	802.11 Frame Format . . . . .	5
1.2	802.11 Physical Layer [2] . . . . .	6
1.2.1	Challenges for 802.11 PHY . . . . .	6
1.2.2	Variants of 802.11 . . . . .	7
<b>2</b>	<b>802.11n Features</b>	<b>8</b>
2.1	Frame Aggregation . . . . .	8
2.1.1	Motivation . . . . .	8
2.1.2	Description of Mechanisms . . . . .	9
2.2	MIMO Techniques . . . . .	10
2.2.1	Spatial Diversity . . . . .	11
2.2.2	Spatial Multiplexing . . . . .	12
2.3	802.11n MIMO-OFDM Standard . . . . .	14
2.4	Channel Bonding . . . . .	15
<b>3</b>	<b>Performance Evaluation of 802.11n</b>	<b>18</b>
3.1	802.11n Under The Microscope [6] . . . . .	19
3.2	Experimental Characterization of 802.11n Link Quality at High Rates [5] . . . . .	23
